

The park master plan will lay the framework to preserve the **CHARACTER** of the existing parkland

while providing flexible community **AMENITIES** for all.

Placed to serve as the hub of the park, the pavilion is centered in the middle of the site for ease of access and safety. The layout combines both maintained turf for flexible open space uses and the establishment of a native meadow for a portion of the site. There are many options for exploration through a meandering loop trail layout and connection walks while serving the neighborhood with many options for seating, gathering and play.

EARL J. POMERLEAU POCKET PARK

Park Master Plan - DRAFT
